

USB - UART Isolated Converter Industrial Grade

Sunrom
Part#
1435

Plugs in USB on PC and provides new Isolated UART of 3V to 5V level for external device interfacing. Industrial grade, 1KV isolation, 600W TVS & ESD lighting protection, LED indicators, Wall & Panel mountable, USB 2.0, EMI, EMC, IEC compliance specs

Introduction

Our USB-UART converter have been designed to convert bidirectional USB to UART interface in TTL level.

A virtual serial port is created in the PC to access the serial line. LEDs indicate power on and data transmit and receive status.

Figure 1 After connecting, “a virtual serial port” is created in your PC. Within the system it acts like a standard serial COM port.

Features

- ARM 32-bit controller for 24x7 Stable Industrial Operation
- Galvanic Isolated Interface for Power and Data
- Powered from USB, No external power is needed
- ESD Protection for USB
- Lightning and Surge Protection
- LEDs indicate power, transmit and receive
- Pluggable Terminal design for easy replacement
- High quality Mini-USB Cable with Ferrite for noise suppression
- Easy to mount on wall or panel
- Easy to use with standard software which works with serial ports
- Automatically Data switching from transmit to receive without any delay
- Zero Configuration - Adapts serial port settings from PC software automatically.

Applications

- Communication with UART TTL device and a PC
- PC protection against overvoltage
- Interruption of ground loops

Specifications

Parameter	Value
Working Voltage	5V DC from USB Cable supplied with unit
Current Consumption	125 mA
Max. Data Transfer	500 kbps (All standard baud rate supported)
Controller Chipset	ARM 32 Bit
USB Driver	Single Driver supports Windows 32-64 bit OS like XP/NT/Vista/7/8/10 (No driver required on Linux)
Transmit/Receive	Automatically Data switching without delay
Temperature range	-40 to +85 °C (-40 to 185 F)
Configuration	No configuration needed. Unit automatically configured baud rate and settings as per PC software.
USB Port	Mini-B (MiniUSB) type built in to the unit
Degree of Protection	IP 30
Box Dimension	45x70x18mm
Box Material	ABS

Module Pin Details

Pin	Details
GND	Common Ground
TX-OUT	Transmit Output - 3.3V Level, Also suitable for 5V
RX-IN	Receive Input - 5V Tolerant

Installation

Step: 1 - Install USB Driver

It is recommended to install USB Driver before connecting device to your PC.

Visit Download USB VCP on this page <https://www.sunrom.com/m/1435>

Once Install you can view the installed com port by going to **Device Manager>Ports** or **Start > Device and Printers**

The USB driver setup work for both Windows 32 bit and Windows 64 bit OS.

Normally your system assigns a unique COM Port to the device. If required for your software optionally you can change that by going to **Device Manager > Ports > Properties > Advanced**

Step: 2 - Use a software to test

You can use any software like Terminal to test data communication

Support

Sunrom Electronics offers free technical support (www.sunrom.com/contact) for customers, until the end of the product's lifetime, so if something goes wrong, we're ready and willing to help!

Technical Support is available by email only and scope is limited to problem faced during use of the use of product and does not cover end user programming and hardware troubleshooting.

Each product passes through strict quality checks before it reaches you. So if something is not working out right, the first thing to doubt is the connections or programming of your hardware.
