

SLIDE SWITCH - 8.6MM

PCB Mountable Slide Switch. Single Pole, Double Throw = SPDT

This switch can be on in both positions, switching on a separate device in each case. It is often called a changeover switch. For example, a SPDT switch can be used to switch on a red lamp in one position and a green lamp in the other position. A SPDT slide switch may be used as a simple on-off switch by connecting to COM and one of the A or B terminals shown in the diagram. A and B are interchangeable so switches are usually not labeled.

DIMENSIONS

SPECIFICATIONS

Product Name	Slide Switch
Contact Type	SPDT - Single Pole Double Throw
Current Rating	300mA
Voltage Rating	DC 30V
Contact Resistance	<30m Ohm
Contact	1P2T - Nickel Tin Plated
Insulation Resistance	100m ohm min for 500V DC
Proof Voltage	500V AC for 1 min.
Operating Force	150+100gf
Operating Life	50,000 cycles
