Vibration Sensor switch(high sensitive) SW-18010P	2011-2-18	8-1

Function:

1.vibration detecting

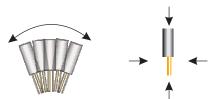

Applications

Security devices
toys
Electronic scales

Features:

- 1.SW-18010P series are spring type, no directional vibration sensor trigger switch, any angle can trigger
- 2.Switch is open circuit OFF-state, when it is static, when external force to touch and corresponding vibration, or movement speed achieve adequate (partial) centrifugal force, conductive pick feet will produce instant conductivity is instant ON-state, when external force disappear, switch back to open circuit OFF-state.
- 3.Switch have the identification P at the bottom, for completely airtight;
- 4.In the normal, switch life can reach 20,0000 cycles lifespan
- 5. This series Switches have trigger high sensitivity
- 6. Apply to security devices toys electronic scales products

when external force to touch and corresponding vibration, or movement speed achieve adequate (partial) centrifugal force, conductive pick feet will produce instant conductivity is instant ON-state
